

MANDOX

WHITEPAPER

Version 1.2 December 2021

WELCOME TO MANDOX

\$MANDOX is an ERC-20 token launched on 11/26/21. \$MANDOX is a token formed to bridge the gap between crypto currency and NFTs. It is a platform where crypto enthusiasts, as well as crypto artists, can have a safe place to come and venture deep into the cryptoverse.

At Madox artists will have the capability to market their NFTs, as well as their Music. With a purchase of \$MANDOX, you can simply register your art on our platform, making it your platform. \$MANDOX is a community driven platform with big plans to give back, with two percent of every transaction going to a "Missions" Wallet. When you join up with Madox, you will be joining something bigger than crypto, you are joining a movement, a movement to help yourself and others around the world.

MANDOX

OUR MISSION

The core of Madox is to help those in need. That's why 2% of the reflections of every buy / sell of our token will be directed to a Missions wallet that will enable us to branch out in our desire to help fight poverty and those with desperate and unfortunate realities.

With feet on the ground in Guatemala, we are constantly trying to change people's lives. With \$MANDOX, it allows everyone to get their feet in, see the changes being made, and enjoy Crypto to the fullest. There is so much money involved in crypto, yet the littlest things can change someone's life drastically.

\$MANDOX will do just that and bring financial freedom to some new faces in the space. Welcome along on this amazing journey of Madox Token.

TAKE A LOOK AT OUR GUATEMALA MISSION

TOKENOMICS

PASSIVE INCOME

2% of every transaction with \$MANDOX is deducted and redistributed to our pool of holders. It means that just by holding it you will see the number of tokens increasing automatically everyday as the community transacts.

MISSIONS

2% of every transaction with \$MANDOX is deducted and redistributed to our Missions Wallet. This will allow us to help missions and people in need all across the world.

BURN

2% of every transaction with \$MANDOX is deducted and redistributed to a burn Wallet. This will constantly reduce the active circulating supply of the token.

MARKETING

2% of every transaction with \$MANDOX is deducted and redistributed to our Marketing Wallet. This will allow us to continue developing the project with the best quality possible.
